- Taking care of responsibility and quick learning.
- Solving coding error deal with coding knowledge.
- Decision and feedback according to coding knowledge.

Job History Summary

After graduating from the University of Computer Studies, Yangon, specializing in computer science, I joined Itami Art Co., Ltd. (Myanmar branch office). An advertising company that sells promotional materials such as original banners and curtains from the Internet. For about three years after joining the company, I used Adobe Illustrator and Photoshop to design and process the banners requested by customers. From the 4th year of joining the company, I was transferred to the head office in Okayama and assigned to the WEB design group and coding team of the marketing section. Since I was transferred, the workflow and contents have changed and I tried to create a website. I considered the work of responding to Responsive sites such as creating sales pages and official websites for our websites, coding LP pages, and using WordPress from the customer's perspective, and responded to make the site easy to see and use. It has been evaluated as being able to respond to work with a sense of speed. In addition, I give a coding lecture to the staff in the Myanmar branch office and perform work distribution and coding checks.

About Myself

My strength is a sense of responsibility. I can work with a strong sense of responsibility for my role.

I have some knowledge about coding before joining the company, but after joining the company, by doing work that has nothing to do with coding, I can challenge myself and get used to the new environment so that I can know what I do not know.

For about three years after joining the company, I worked at a branch office in Myanmar, using Adobe Illustrator and Photoshop to design and process banner flags. From the 4th year of joining the company, I was transferred to the head office in Okayama and joined the WEB design group coding team of the marketing section.

The workflow and contents were completely different, and the work environment changed, but I was able to overcome any difficulties due to my responsibility to do everything to the end, no matter what my strength was. It was a great opportunity for me, who has coding knowledge and wants to be a web developer. Regarding work, I studied by dealing with detailed correction tasks and tried to create a site. From there, I improved my skills and was challenged to create a Responsive site, WordPress site, JavaScript, PHP modification, and expanded the range I can do.

PROFESSIONAL QUALIFICATION

- ➢ Japanese Language Proficiency Test (N2)
- ➢ English (intermediate level)

SKILL

- ➢ HTML, CSS
- ➢ Responsive Website creation (Media Queries/Materialize)
- ➢ WordPress
- ➢ JavaScript, jQuery

- PHP
- GitHub, GitLab
- Adobe
- Visual Studio, Dreamweaver
- 4Dbox Plans, Figma
- Microsoft office

Capabilities

- Strong confident my qualification and skills
- Work under pressure
- Manage on project
- Leadership skill
- Physically fit
- Time management
- Experience in problem solving skill

Reason For Leaving

- To get new challenge and update experiences.
- I am strongly interested in a new challenge and an opportunity to use my technical skills and experience in a different capacity than I have in the past.
- I here declare that all the above information furnished is true and complete to the best of my knowledge.

Yours   Sincerely,
Khin Kyi Kyi Khine (Ms.)
